

CME & Workshop on Basic Principles and Trouble shooting in Immunohistochemistry

24th & 25th September 2022

Last Date of Registration : 12/09/2022

Venue: Narayana Medical College, Chinthareddypalem, Nellore

Organized by
Department of Pathology

Dear Colleagues ,

Immunohistochemistry the process of identifying antigenic molecules in cells and tissues by antibodies binding specifically to them has always fascinated Pathologists to such an extent that it has become a staple of our histopathology practice.

IHC has come a long way since Albert Coon's conceptualized and first implemented the procedure in 1941.

Apart from its application in surgical pathology for immunophenotyping tumours it is also widely used in basic research to understand the distribution and localisation of biomarkers used as molecular targets and for protein profiling in common cancers.

The Department of Pathology, Narayana Medical Collage and Hospital, is hosting a 2 day CME and Workshop on IHC under the auspices of Dako IHC products ,on 24th and 25th of September 2022.

The first day of the CME will be having a series of lectures covering Principles and Trouble shooting in immunohistochemistry followed by organ specific IHC by eminent faculty and a hands on workshop the second day.

Faculty , post graduates and technicians are all invited to register and make the CME a grand success.
